

JD-XA Users' Sounds

WELCOME

Here we have the first release of sounds as developed and shared by members of the JD-XA users Facebook group. It is hoped this will grow over time!

There are 11 diverse banks of 16 sounds and it is hoped you enjoy using these sounds in your own musical creations on the JD-XA. Some of the banks have descriptions for your guidance. Simply unzip, then copy the sounds into an empty [PROGRAM] folder on your USB stick. Then plug it in to your JD-XA, press the [USB Memory] button and navigate to the bank you put the sounds into.

CREDITS: Big thanks to **Lello Calliando** for allowing us to package his sounds in this collection. Big thanks too also go to **Jeff Toman** and **Joe Doolittle** for each providing a bank of sixteen sounds. Additionally, I am hugely grateful to **Joe** for his much-needed help to pull this all together.

Feedback is welcome on this collection and of course, if you would like to contribute your sounds as part of a future release, your participation will be warmly welcomed.

Enjoy Neil Gowans

PS the final bank is my own little offering... !

SMALL PRINT: Please do not distribute any of these sounds without prior permission nor without crediting the original authors.
